

Level	Numeric value	Typical use	Traceback?
<code>debug</code>	10	Fine-grained detail, useful only when actively troubleshooting (e.g., "requesting URL X with params Y")	No
<code>info</code>	20	Routine, expected events worth recording but not concerning (e.g., "no records for 1958 — predates station")	No
<code>warning</code>	30	Something unexpected or worth attention, but the program can continue normally	No
<code>error</code>	40	An operation failed	No (unless you use <code>.exception()</code> or <code>exc_info=True</code>)
<code>critical</code>	50	Severe failure — the whole program may not be able to continue	No (unless you use <code>.exception()</code> or <code>exc_info=True</code>)
